

Team Name: sdmay24-20

Team Members: Brendon Droege, Camron Corcoran, Corey Lieu, Susanna Noble, Bryan Pope, Leha Dutta

Report Period: Oct 23-Nov 5

Summary of Progress in this Period

For the report period, our group has finalized all related research for an introductory start to our Research Paper. We have created our Overleaf (LaTeX) IEEE Standard Research Paper and have begun work on that. We switched to meeting our advisor every week and have geared our paper to a specific goal and have broken ground on the introductory works and direction we want to take. We also started our second direction of creating an introductory lab for all PAWR platforms.

Pending Issues

None at this time.

Plans for Upcoming Reporting Period

We plan on having a good chunk of our introductory lab completed and a clear mission and direction there. We also plan on completing a good amount of work on our Research Paper nearing a complete and final rough draft.
